

Whole-Class Digital Curriculum Extended for Teachers to Create Individualized Learning Paths

This week Ignite! Learning introduces next generation enhancements that incorporate innovative student access and assessment components, extending the usage of Ignite!'s award winning digital content program beyond the traditional classroom.

Inspired by feedback from teachers and administrators in Ignite! customer districts such as [Leander Independent School District](#) and [Carrollton-Farmers Branch Independent School District](#), the new online program allows teachers to quickly create and customize student assignments incorporating Ignite! multimedia, authentic student assessments, and new forms of summative assessments. The system effectively extends Ignite!'s award winning whole class instruction system by enabling a teacher to create individualized learning paths that feed results back to the teacher to further inform instructional plans.

“We understand that learning doesn't end at the classroom door and further that students today should have a role in co-managing their learning process”, states Josh Bohls, Ignite! Vice President of Product Management. “Last year we focused on technology integrations and custom correlation services to a district's local scope and sequence, as evidenced by our partnership with [CSCOPE](#). This year we are dedicated to completing the circle of learning by developing valuable tools to inform administrators, teachers, and students of real-time academic progress.”

This new classroom extension comes on the heels of the [Ignite! Vision](#) curriculum tracking information service released last year and recently updated to include more granular reporting options and visual dashboards. Ignite! Vision provides a window into the classroom for district and school administrators to identify “bright spots” of success, which can then be replicated across the district with the help of Ignite!'s professional development staff.

“Ignite! Vision fulfills a promise to our customers of greater awareness and visibility of how our program is being adopted and used across the district,” remarks Ignite! CEO Ken Leonard, “and it provides a mechanism for districts to hold us accountable to meeting stated program goals.”

The updated Vision tracking service is available now for all Ignite! ION district customers, and the student access system will be available in the spring. Call 866-464-4648 or email sales@ignitelearning.com to schedule a demonstration!

ABOUT IGNITE! LEARNING (www.ignitelearning.com)

Ignite! Learning is the leading middle school digital content solution focusing on motivating hard to reach learners and enhancing local standards-based instruction. Ignite!'s interactive Math, Science, Social Studies, and Special Education solutions are available for all 50 states across grades 4 through 8. Ignite! Learning targets lasting middle school progress with interactive materials designed to state, local, subject, and grade level priorities that integrate with existing technology, support classroom instruction, and promote critical thinking.
